

BEYOND PREDICTION: TECHNOLOGY-ASSISTED REVIEW ENTERS THE LEXICON

Publications

30, January 2024

By: Bartko Law

Last February, U.S. Magistrate Judge Andrew Peck took American litigation another step into the digital domain: He backed the use of predictive coding, a form of technology-assisted document review, in an employment case. J. Eric Bartko, resource manager for the LTN technology award winning litigation support division of BartkoZankel, calls Peck's ruling neither surprising nor shocking since technologically aided review has been here to stay for a long time.
